Summary

Full-Stack Software Engineer with 3+ years of experience delivering scalable web applications in enterprise environments. Strong background in .NET (C#), Node.js (NestJS/Express), ReactJS and Angular, with proven practice in Clean Architecture, Domain-Driven Design (DDD) and TDD. Track record in legacy modernization, designing high-performance REST and GraphQL APIs, implementing testing strategies and CI/CD. Focused on technical ownership, system scalability and operational reliability.

Professional Experience

Full-Stack Engineer | Table IT | August 2025 – Present

- Develop full-stack solutions with .NET (C#), Node.js (NestJS/Express), ReactJS and Angular, building scalable APIs and modern SPA interfaces.
- Led migration of legacy ASP system to modern architecture (.NET + React/Angular), decreasing post-deploy risks and improving delivery velocity.
- Designed and maintained REST and GraphQL APIs with focus on performance, data modeling and security (JWT, access control).
- Implemented secure authentication services for automated integrations using RSA encryption and digital signatures in production.
- Work with observability, logging and CI/CD pipelines (Azure DevOps/Git) to enable predictable deployments and safe rollbacks.
- Collaborate with stakeholders on technical design and prioritization.

Full-Stack Engineer | Movtech Systems | September 2022 - August 2025

- Led legacy migration (VB.NET → C#/.NET Core) and architectural redesign using Clean Architecture and DDD, reducing technical debt and improving maintainability.
- Designed and built scalable APIs using .NET Core and Node.js (Express/NestJS), including authentication, versioning and clear API contracts.
- Architected SPAs with Angular and ReactJS focused on component reuse, state management and render performance.
- Implemented asynchronous Node.js services for integrations and batch processing to improve throughput and system decoupling.
- Defined automated testing strategy (unit, integration, E2E) with XUnit, Jest and Cypress, raising release reliability.
- Active participant in architecture decisions, code reviews and engineering standards.

Technical Skills

Frontend Technologies:

- Angular, ReactJS, Next.js, TypeScript

Backend Technologies:

- .NET Core/Framework, C#
- Node.js, Express.js, NestJS
- RESTful APIs, Microservices Architecture

Databases & Storage:

- SQL Server, Oracle, MySQL, PostgreSQL, MongoDB, Redis
- Entity Framework, Drizzle, Prisma

Testing & Quality Assurance:

- XUnit, Jest, Cypress
- Test-Driven Development (TDD), Unit Testing, Integration Testing, E2E Testing

Cloud & DevOps:

- AWS (Cloud Foundations Certified)

Education

- Bachelor's Degree in Systems Analysis and Development | SENAI (Brazil) | 2022 - Dec 2024

Certifications

- AWS Academy Graduate - AWS Academy Cloud Foundations | Issued in May 2024
- The Complete Agile Scrum Fundamentals Course | Issued in January 2023

Languages

- Portuguese (Native)
- English (Advanced)
